Response to Amendment

In response to the office action mailed on 11/2/05 applicant has cancelled claims 8, 26, and 42-89. Currently claims 1-7,9-25,27-41 are pending.

Response to Arguments

In response to the previous office action applicant has filed Terminal Disclaimer to overcome double patenting rejection. However, prior art cited in PTO 892 and IDS filled after 3/2/06 are considered to read on applicant's invention. Furthermore, claims seem to recite limitations of different species. In order to reduce search burden on the examiner, species restriction is considered proper. Applicant is requested to respond to the election/restriction in the upcoming remark.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

species 1: figure 1c, claim 3

Species 2: figure 1f, claims 9,14, and 15

Species 3: figures 2ab, claims 10-13, and 34

Species 4: figure 3, claims 16-20, and 33

The species are independent or distinct because each species claim distinct structural limitation.

For example, species 1 requires "ridges" which is not required by other species (see claim 3).

Art Unit: 3743

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1,2,4-7,21-25,27-32, and 35 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 3743

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

3. The abstract of the disclosure is objected to because specification is not legible (see pages 3-6, and 9). Applicant is requested to file an unmarked/legible copy of the specification. Correction is required. See MPEP § 608.01(b).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4,998,621; US 6,163,288; US 6,568,533; US 4,402,69 disclose medicament packaging system.
